Description: The snowshoe hike will start at the Weißsee Glacier World ticket office. From there, the tour will follow the road to the junction with a forestry road. This is where the real winter adventure begins. If you are lucky, you will see animal tracks along the forestry road and then the woodland path. The forest thins out after about 3km and the destination is within reach. Once you reach a mountain hut, you will be able to see the high alpine parts of the Stubach valley. You are now in a world that reveals the mystical magic of winter! Return along the same route.
